

## **HOSTED EXCHANGE ADD-ON SERVICES**

One huge benefit of hosted Exchange is the range of simple and cost-effective add-on services. Where companies with in-house Exchange face some difficulties, hosted Exchange makes these headaches disappear.

### **BLACKBERRY**

Running a BlackBerry Enterprise Server could be expensive – so leave it to the experts. Our hosted Exchange includes an instant BlackBerry option, where you pay a low monthly fee and we handle everything, so it just works. You get BlackBerry service fully integrated with your company's Exchange email, with zero management or upfront costs required.

### **GOODLINK**

GoodLink is a great alternative to BlackBerry. With a wide choice of devices, including the popular Treo, it gives your staff real-time synchronized access to their email, calendars, contacts and information. With no management required, unleash your company's productivity for just a few dollars per month.

### **ANTI-SPAM**

As well as the full anti-virus included with hosted Exchange, our optional anti-spam feature will shield your employees from almost all spam email – and make them more productive. Monitored and updated 24x7, it is an enormous advantage over running an in-house Exchange server.

### **ARCHIVING**

We offer the ability to 'turn on' archiving instantly. You can choose either basic archiving, which simply keeps a mirrored copy of your data, or advanced archiving, which keeps an offsite copy of all data and ensures the archive is compliant with major financial, healthcare and other regulations.

### **FAX VIA EMAIL**

Get a local fax number and receive all your faxes as PDF email attachments.

### **DISK SPACE**

With our fully-managed hosted Exchange service, there is no need for complex hardware upgrades and downtime. As your company mailboxes grow larger in size, just add extra capacity instantly for a low monthly fee.

**Hosted Exchange gives your business cost-effective, enterprise-grade email on demand – plus add-on services previously available only to large corporations.**
